

NEREID 660

The Nereid 660 blades are intentionally designed for freediving and spearfishing. Their construction includes Spread Tow carbon fabric for the outside layers, while the inside features a cutting-edge combination of unidirectional and multiaxial fabrics to enhance reactivity and efficient energy transfer. The main difference is the 30-degree angle and special tip reinforcement that adds that final surge of power at the end of each stroke. These blades are specifically crafted for deep dives, spearfishing, or freediving.

The Nereid 660 blades stand as the ultimate choice for diving into depths, embarking on spearfishing adventures, or freediving. With these blades, you will experience an instantaneous surge of power at the tips of your toes, providing you with all the capability you need for any diving endeavor.

Specifications:

Total length of blade: 790mm

Blade width: 190mm

Length after bend: 660mm

Bend angle: 27 degrees

Total layers: 11

Axis of reinforcement: 14

Warranty: 5 years

Blades are available in soft ,medium-soft ,medium, medium-hard or hard
